

Executive Summary

An Indian automobile manufacturer managing 1,500+ suppliers needed faster, scalable vendor due diligence. Manual assessments slowed onboarding and limited risk visibility. Using Risk Master, the Risk & Compliance team centralized supplier intelligence, automated risk checks, and enabled continuous monitoring, accelerating due diligence, improving risk oversight, and ensuring supply chain integrity.

Industry:
Manufacturing

Vendor Size:
1500+

Location:
India

Background

A leading automobile manufacturing enterprise with a global supplier network supports production and operations. Managing suppliers across subsidiaries and partner entities requires rigorous due diligence to ensure compliance, financial stability, and operational reliability, while minimizing risk exposure across the supply chain.

The Challenge

Managing due diligence for a large supplier network created several operational and risk management challenges.

Key challenges included:

- Limited visibility into supplier risk profiles
- Manual KYC, financial, and compliance verification processes
- Difficulty identifying high-risk suppliers during onboarding
- Lack of continuous monitoring after supplier onboarding

Why SignalX

SignalX Risk Master was selected to streamline supplier due diligence and risk intelligence across the organization.

The platform enables:

- Centralized supplier risk intelligence
- Automated due diligence across 9 risk dimensions and 27 parameters
- Instant risk assessment reports for faster vendor onboarding
- Continuous third-party risk monitoring and alerts

Solution:

Risk Master centralized supplier intelligence and automated KYC, financial, and compliance checks. Risk reports were generated instantly, enabling faster assessments. Continuous monitoring and alerts helped teams proactively track supplier risk, ensuring visibility and control throughout the supplier lifecycle.

1. Centralized Supplier Risk Intelligence
2. Automated Due Diligence and Risk Assessment
3. Risk-Based Supplier Classification
4. Continuous Monitoring and Alerts

Results

The implementation of Risk Master delivered measurable improvements in efficiency, visibility, and risk management.

Key outcomes included the following:

- Centralized Supplier Risk Intelligence
- Automated Due Diligence and Risk Assessment
- Risk-Based Supplier Classification
- Continuous Monitoring and Alerts

45% Improvement in High-Risk Detection

60% Faster Due Diligence Turnaround

About SignalX:

SignalX is a risk infrastructure company that enables enterprises to manage risk at scale. We provide AI-driven systems to identify risks, automate due diligence, and continuously monitor third parties and suppliers, transforming fragmented processes into a unified, always-on infrastructure layer.
